Education

FAST University

Aug 2019 – Jun 2023

Bachelor of Computer Science

Experience

Data Scientist

Jan 2024 – Present

Machine Learning 1 Pvt Ltd

Lahore, Pakistan

- Working on machine learning, document processing, computer vision, and generative AI projects, including **KYC automation, AI agents, and RAG-based services**.
- Collaborating with cross-functional teams to deploy models into production and ensure **scalable, reliable performance**.

Machine Learning Engineer Intern

Aug 2023 – Oct 2023

GlowingSoft Technologies

Lahore, Pakistan

- Developed Python scripts, optimized SQL queries, performed data preprocessing, and built ML models for real-world datasets.
- Created visual dashboards, automated scraping workflows, and contributed to **8+ data-driven projects**.

Freelance Machine Learning Engineer

Jan 2023 – Jun 2023

Upwork & Fiverr

Remote

- Delivered ML, automation, and data processing solutions to global clients with a strong focus on **accuracy, timelines, and client satisfaction**.
- Developed and deployed **multiple end-to-end ML solutions** spanning **classification, NLP, and intelligent data pipelines**, achieving **95%+ accuracy** and streamlining workflows to save **60% of manual effort**.

Research and Development – KYC Services | Machine Learning 1 (PF)

Jul 2024 – Present

- Developed and maintained ML- and computer vision-based document verification systems for ID cards, passports, driving licenses, and business registrations, achieving **>95% extraction accuracy**.
- Fine-tuned and deployed large language models (**Phi-3, Mistral-7B, LLaMA-3**) for KYC/KYB document analysis, improving extraction accuracy by **25–40%** and achieving **>95% field-level accuracy**.
- Built an automated compliance document processing pipeline that reduced manual review time by **60–70%** and doubled onboarding throughput.
- Implemented entity resolution and risk screening (PEP and sanctions checks), reducing false positives by **30%** and improving compliance decision quality.
- Optimized model inference using quantization and batching, reducing latency by **35–50%** and lowering compute costs by **40%**.

Freelance Department Intern | Machine Learning 1, Lahore, Pakistan (PF)

Jan 2024 – Jun 2024

- Developed and delivered high-quality solutions within deadlines, ensuring **customer satisfaction**.
- Coordinated with teams for timely project delivery and effective communication.
- Provided post-delivery support, resolving issues and ensuring client satisfaction.

Projects

Intelligent Text-to-SQL Chatbot | Python, LangChain, MySQL, SQLAlchemy

June 2025

- Engineered an AI-powered chatbot that transforms natural language queries into precise SQL commands using **Google Gemini 2.0 Flash** and LangChain.
- Integrated MySQL via SQLAlchemy and PyMySQL, enabling **secure, real-time database interaction**.
- Designed modular LangChain pipelines with advanced prompt engineering to ensure **accurate and context-aware SQL generation**.
- Automated Human Resources System**
 - Developed an AI-driven workflow for resume extraction using OpenAI, enhancing **candidate data extraction precision**.
 - Built a robust PostgreSQL database for secure candidate data storage and designed APIs for automated candidate screening.
- Pharmaceutical Bot**
 - Created an RAG system using LangChain and OpenAI for generating **SOPs tailored to the pharmaceutical industry**.
 - Implemented BGE small embedding with FAISS DB for effective chunk retrieval, achieving **faster response times** with streaming enhancement.

Personal AI Assistant Automation Platform | *Python, n8n, Streamlit, OpenAI, Google APIs* [GitHub](#)

- Built an AI-powered personal assistant that can send emails, schedule meetings, manage tasks, create documents, and perform web searches through conversational commands using LLM agents and n8n workflows.
- Integrated Google Workspace APIs and autonomous workflow pipelines to execute multi-step productivity tasks with minimal manual intervention.

WhatsApp Visa & Travel Automation System | *n8n, Twilio WhatsApp API, Groq LLM, LlamaIndex* [GitHub](#)

- Developed an AI-driven WhatsApp automation system that collects travel documents, extracts passport details, updates applicants, and tracks visa application workflows in real time.
- Engineered scalable event-driven automation pipelines to streamline high-volume visa and travel operations with reduced manual coordination.

AI Voice Agent Platform | *Vapi AI, OpenAI, Python, APIs, Automation Workflows* [GitHub](#)

- Built a real-time AI voice agent capable of answering calls, handling customer conversations, booking appointments, responding to queries, and triggering automated workflows using Vapi AI and LLMs.
- Integrated conversational AI with external APIs and automation systems for dynamic voice-based task execution and real-time responses.

Data Science Intern (Remote) Jul 2023 - Aug 2023

GlowingSoft Technologies City, Lahore

- Developed Python scripts for efficient data preprocessing and prediction, covering **8 projects**. Optimized SQL queries for datasets up to **1M rows**, created visualizations with Matplotlib/Plotly, and scraped data from 10+ websites.
- Designed and optimized data pipelines, engineered robust features, and rigorously validated models for **maximum accuracy**.

Technical Skills

Programming Languages: Python, SQL
Machine Learning: Supervised learning, classification, regression, clustering, model evaluation
Data Preprocessing: Data cleaning, feature engineering, normalization, imputation, outlier detection
Libraries & Frameworks: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, XGBoost, LightGBM
NLP: Text classification, sentiment analysis, NLTK, SpaCy, Hugging Face
Data Visualization: Power BI, Matplotlib, Seaborn
Version Control: Git, GitHub, GitLab
Databases: MySQL, MongoDB

Achievements

Awarded a **Performance Certificate** for exceptional contributions to the project, on Aug 8, 2024.

Certifications

Introduction to Data Science – Coursera
Practical Implementation of Data Science – Simplilearn
Building Applications with Vector Databases – Deeplearning.ai
IBMI Project Management Certificate – IBMI
Statistical Decision Making in Data Science – Coursera
