Education

FAST University

Bachelor of Computer Science

August 2019 – June 2023

Experience

Data Scientist

Machine Learning 1 Pvt Ltd

Jan 2024 – Present

Lahore, Pakistan

- Working on machine learning, document processing, computer vision, and generative AI projects, including KYC automation, AI agents, and RAG-based services.
- Collaborating with cross-functional teams to deploy models into production and ensure scalable, reliable performance.

Machine Learning Engineer Intern

GlowingSoft Technologies

Aug 2023 – Oct 2023

Lahore, Pakistan

- Developed Python scripts, optimized SQL queries, performed data preprocessing, and built ML models for real-world datasets.
- Created visual dashboards, automated scraping workflows, and contributed to 8+ data-driven projects.

Freelance Machine Learning Engineer

Upwork & Fiverr

Jan 2023 – Jun 2023

Remote

- Delivered ML, automation, and data processing solutions to global clients with a strong focus on accuracy, timelines, and client satisfaction.
- Worked across diverse domains, completing multiple end-to-end ML projects including classification, NLP, and data automation.

Projects

Intelligent Text-to-SQL Chatbot | *Python, LangChain, MySQL, SQLAlchemy*

June 2025

- Engineered an AI-powered chatbot that transforms natural language queries into precise SQL commands using Google Gemini 2.0 Flash and LangChain.
- Integrated MySQL via SQLAlchemy and PyMySQL, enabling secure, real-time database interaction.
- Designed modular LangChain pipelines with advanced prompt engineering to ensure accurate and context-aware SQL generation, empowering non-technical users with seamless data access.

Research and Development – KYC Services | | Machine Learning 1 (PF)

July 2024 – Present

- Develop and maintain document verification services using machine learning and computer vision for various documents (ID cards, passports, driving licenses, etc.).
- Led client meetings to analyze data needs, refine data-driven strategies, and provide actionable insights, aligning with project goals and enhancing collaboration.
- Developed generative AI solutions focusing on Retrieval-Augmented Generation (RAG) systems and AI Agents, leveraging Lang Chain, LLAMA, Open AI, and vector databases (FAISS, Chroma Db) to streamline complex workflows and deliver high-impact results.
- Collaborate with cross-functional teams to integrate services into production and document model processes for scalability.
- Build datasets, trained and validated models to ensure optimal performance and scalability.

Freelance Department Intern | Machine Learning 1, Lahore, Pakistan (PF)

Jan 2024 – June 2024

- Developed and delivered high-quality solutions within deadlines, ensuring customer satisfaction.
- Coordinated with teams for timely project delivery and effective communication.
- Provided post-delivery support, resolving issues and ensuring client satisfaction.

- **Automated Human Resources System**

- Developed an AI-driven workflow for resume extraction using OpenAI, enhancing candidate data extraction precision.
- Built a robust PostgreSQL-based database for secure candidate data storage and designed APIs to facilitate efficient candidate screening with automated MCQ distribution.

- **Pharmaceutical Bot**

- Created an RAG system using LangChain and OpenAI for generating Standard Operating Procedures tailored to pharmaceutical industry requirements.
- Implemented BGE small embedding with FAISS DB for effective chunk retrieval, achieving faster response times with streaming enhancement.

Olympics Data Analysis | *Python, NLP, Matplotlib, Streamlit, Scikit-learn*

September 2023

- Utilized Streamlit to develop an interactive frontend, incorporating dynamic graphs that visually represented regional medal distributions. This experience not only refined my proficiency in data manipulation.
- This allowed me to present a visually engaging exploration of regional medal distributions, contributing to a comprehensive understanding of global sporting achievements.

Data Science Intern (Remote)

July 2023 - August 2023

GlowingSoft Technologies

City, Lahore

- Developed Python scripts for efficient data. preprocessing and prediction, covering a total of 8 projects. Optimized SQL queries to analyze extensive datasets comprising up to 1 million rows, delivering actionable insights. Created interactive data visualizations using Matplotlib and Plotly. Performed web scraping using tools like Selenium and BeautifulSoup, extracting data from 10+ website .
- Designed and optimized data pipelines, engineered robust features, and rigorously validated models to maximize accuracy and predictive effectiveness.

Technical Skills

Programming Languages: Python, SQL

Machine Learning: Supervised learning, classification, regression, clustering, model evaluation

Data Preprocessing: Data cleaning, feature engineering, normalization, imputation, outlier detection

Libraries & Frameworks: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, XGBoost, LightGBM

Natural Language Processing (NLP): Text classification, sentiment analysis, NLTK, SpaCy, Hugging Face

Data Visualization: Power BI, Matplotlib, Seaborn

Version Control: Git, GitHub, GitLab

Databases: MySQL, MongoDB

Achievements

Awarded a **Performance Certificate** for exceptional contributions to the project, on August 8, 2024.

Certifications

Introduction to Data Science – Coursera

Practical Implementation of Data Science – Simplilearn

Building Applications with Vector Databases – Deeplearning.ai

IBMI Project Management Certificate – IBMI

Statistical Decision Making in Data Science – Coursera
